

FOR IMMEDIATE RELEASE

TurnKey Internet Announces Partnership with Parallels to Offer Web Hosting Automation and Virtualization Products

ALBANY, NY, June 10, 2009 – [TurnKey Internet](#) today announced it will offer advanced Web hosting automation and virtualization services via Parallels Virtuozzo Containers and Parallels Plesk Panel. The [Parallels](#) partnership gives TurnKey the ability to offer these products as software-as-a-service (SaaS) value add-ons to its dedicated server Web hosting and virtual private server (VPS) Web hosting product lines.

"We are excited to leverage these highly advanced software products in our dedicated and VPS offerings," said Adam Wills, president and CEO. "Especially in today's economic climate, it is becoming more and more necessary to employ highly efficient hosting automation software that will help business owners maximize performance and lower costs. Parallels is a leader in Web hosting automation and virtualization technologies, and this partnership will enable our customers to realize the benefits of these advanced software product lines. As part of our commitment to both turn-key solutions and pricing, the addition of these products to a customer's dedicated server or virtual private server will be completely seamless and highly affordable."

VPS and dedicated servers offer businesses an affordable and scalable way to host high performance web applications while reducing overhead. Demand for value-focused Internet hosting products has increased in recent months as businesses look to control costs and expand the capacities of their online presence. TurnKey Internet has positioned itself to meet both the performance and value demands from small business, enterprise, and hosting reseller clients with its latest VPS and dedicated server packages.

Availability and Pricing

The 10-domain Parallels Panel will now be offered as a completely free add-on to all TurnKey Internet virtual and dedicated server products. Customers may elect to upgrade to higher domain capacities and add additional capabilities such as Tomcat/Coldfusion for a nominal fee.

All TurnKey Internet Web servers include 24x7 toll-free phone, live chat and help desk support, and offer a 100% network uptime guarantee with a no-questions-asked 30-Day Money Back Guarantee. Clients have the choice of Enterprise Linux or Microsoft Windows Server (2003 or 2008), and can take advantage of Web-based remote reboots, real-time server monitoring, managed firewall services, and off-site backups. To learn more about TurnKey Internet's product offerings, please visit <http://www.turnkeyinternet.net/serverspecials>.

Parallels Virtuozzo Containers server product line will now be available on all TurnKey Internet dedicated servers for a low monthly price (as low as \$70/mo. for a 5-node Parallels Virtuozzo Containers license) and allow small- and medium- businesses the ability to reduce costs, streamline server management, and maximize server density on their dedicated servers.

"Parallels Virtuozzo Containers enables TurnKey to provide customers with a unique VPS offering," said Jack Zubarev, President, Service Provider Division, Parallels. "The aggressively priced VPS and dedicated plans allow customers to break the boundaries of shared Web hosting and better compete in the market."
