

TurnKey Internet Welcomes AngryBirdsNest.com, The Angry Birds' #1 Fan Site

FOR IMMEDIATE RELEASE

Albany, NY, March 10, 2011— Web Solutions provider TurnKey Internet today announced that AngryBirdsNest.com, the world's #1 fan site for popular iPhone video game App Angry Birds, has selected TurnKey Internet for their IT needs. The decision reflects TurnKey Internet's superior pricing, performance and support. AngryBirdsNest.com will utilize TurnKey Internet's services to increase speed and capacity going forward, just in time for Angry Birds version 1.5.2, released March, 10th for the iPhone.

Angry Birds was first released for Apple in December 2009. Since then, Apple's App Store has sold over 12 million copies of the game. Versions of the game have been created for gaming consoles and personal computers with a line of Angry Birds merchandise and a feature film or television series currently under consideration. With over 50 million downloads, the game is considered one of the "great runaway hits of 2010." As the game has grown exponentially in popularity, AngryBirdsNest.com has become the go-to site for fans looking to learn more about the game and interact with the gaming community.

"At AngryBirdsNest.com, we put our users first, so our #1 objective is making sure the site is stable and quick to load," said Greg Kuiver, creator of AngryBirdsNest.com. "With the site continuing to grow we quickly maxed out the capabilities of our previous host. I turned to TurnKey Internet because they were able to provide us with instant capacity at an amazing value to keep up with the demands of hosting the #1 Angry Birds fan site."

"When Mr. Kuiver came to us at 10 PM, he was experiencing traffic overloads and huge slow-downs," said Adam Wills, President and CEO of TurnKey Internet. "We were able to set him up on a fully-loaded dedicated server for less than he was paying for a VPS with his previous host, and had him up and running with all his data transferred over by 5 AM that same night."

TurnKey Internet offers IT on demand with a 100% uptime guarantee and 24x7x365 live customer support. TurnKey Internet has experienced 67 percent growth over the last year by helping businesses cloud source their IT with a wide range of online hosting and business solutions.
