

TurnKey Internet announces partnership with Attracta, Corp. for the inclusion of SEO tools into TurnKey's web hosting offerings

FOR IMMEDIATE RELEASE

Albany, NY, May 29, 2012 – TurnKey Internet today announced the addition of Attracta®, a Search Engine Optimization (SEO) feature, to its cPanel-based web hosting packages. Attracta® is the latest addition to the company's comprehensive suite of professional tools bundled with each web hosting package.

As the world's largest Search Engine Optimization (SEO) service, Attracta® has helped over 2 million websites promote over 3 billion webpages in the world's major search engines. A popular feature of Attracta®, included with TurnKey's web hosting packages, is its "Get In Google" capability, which automatically generates a properly formatted, 1,000-page XML sitemap of a website, submitting it directly to Google, Bing, Yahoo! and Ask search engines, and verifies receipt of the submission. Attracta® also provides link building, malware detection, and social media tools as part of its core feature-set.

"We are pleased to offer Attracta's® best-in-class SEO tools to our web hosting clients," said Adam Wills, CEO of TurnKey Internet, Inc. "These professional SEO tools assist website owners to promote their business via a very easy-to-use interface," he continued.

To utilize Attracta®, TurnKey customers simply log into their website control panel and click any of the "Free Search Engine Optimization (SEO) Tools" icons to get started. TurnKey also provides access to a wealth of SEO tips and Google-produced videos designed to help clients improve their site's visibility in search results.
