

*TurnKey Internet welcomes docSTAR to Latham datacenter*

FOR IMMEDIATE RELEASE

Latham, NY, November 1, 2012

TurnKey Internet, Inc. is pleased to announce the arrival of a fellow Capital Region business to their data center in Latham, NY. docSTAR, a document management software company and subsidiary of Astria Solutions Group, LLC, publicly announced the move yesterday. Located just 12 miles from docSTAR's headquarters in Schenectady, NY, TurnKey Internet is looking forward to hosting a fellow Capital Region small business in their 12,000-square-foot, state of the art, environmentally-friendly data center.

Greg Laird, docSTAR's VP of Product Development commented, "The cloud powers our software and our business. Our growth required a bigger, faster, stronger cloud in order to continue to provide the highest level of service. The TurnKey data center exceeds all of our requirements, so our customers can continue to grow."

He then went on to say, "Data center best practices like redundancy in both power supply and high-speed network connections were essential features. The SSAE 16 Certification puts this facility into an elite class above the old SAS 70 Type II standard." In conclusion, he added, "Plus, we love that we can support another local business."

Provision of superior service is TurnKey Internet's top priority. They are in the midst of proving their commitment to sustainability and the environment by implementing as many green technological alternatives as possible. They recently took extreme measures to safeguard the Latham facility and the clients' data within against the Hurricane Sandy scare. The incorporation of another local business has the TurnKey staff excited about the opportunity to show new members of the Capital Region what they have to offer.

"Of paramount importance is our ability to deliver speed and reliability," remarked Adam Wills, TurnKey Internet CEO. "We also take pride in our innovative green technologies, which have not only helped us become more environmentally responsible, but also placed us on the cutting edge as a cloud services provider offering low-cost, energy-efficient IT services and solutions. We are pleased with the opportunity to spread our business practices to another member of the local business community."
