

TurnKey Internet Offers Web Conferencing With Newly Acquired Voxwire Systems

Acquisition expands the scope of TurnKey Internet's product offerings into web conferencing arena

FOR IMMEDIATE RELEASE

ALBANY, NY, August 19, 2009 – Web hosting provider TurnKey Internet, Inc. today announced its acquisition of Ohio-based Voxwire Systems, Inc., a company offering cross-platform, browser-based web conferencing services. Voxwire represents TurnKey's foray into the billion dollar web conferencing marketplace, a move to expand the scope of its product offerings.

With its Web 2.0-based technology, the Voxwire web conferencing service can accommodate thousands of attendees per meeting with integrated audio and video, screen and file sharing, PowerPoint presentations, whiteboards, text-chatting, polling and other collaborative features. Its platform-independent, Adobe Flash™ -based architecture offers users instant access from any web browser.

With Voxwire, TurnKey aims to offer easy-to-use and cost-effective web collaboration services to connect customers and colleagues across the globe from its Albany, NY data center. At a time when many businesses are leveraging the benefits of telecommuting and virtual offices, TurnKey Internet's Voxwire is strategically poised to meet a web conferencing usage trend projected to grow to \$2.9 billion by 2011*. "Voxwire is a perfect fit with our current web hosting services. It extends our reach across a wide range of industries that are incorporating web conferencing into their operations," said Adam Wills, President. "And schools looking to expand their distance learning capabilities will find Voxwire is a perfect solution," Wills added.

In addition to providing Voxwire Web Conferencing as a retail service, the company will be offering a complete private-label reseller solution for its web hosting resellers and wholesalers. Starting this month, TurnKey plans to cross-promote its hosting services and new web conferencing capabilities to customers worldwide.
