### **TurnKey Internet, Inc Launches Business-Class Cloud Storage and File Sharing Service**

LATHAM, NEW YORK (October 6<sup>th</sup>, 2015) – Sustainable IT solutions provider TurnKey Internet, Inc. announced today the launch of TurnKey Cloud the secure next-generation file sharing and data storage service . The cloud-based file sharing and data storage service targets corporate and business users by delivering a foundation of security, auditing, and privacy features ideal for businesses requiring true cloud-based compliance tracking.

TurnKey Cloud offers enterprise-ready features for secure online cloud-based file sharing and data storage allowing unified access to your data from any desktop or mobile device securely through private key encryption, local caching for off-line and traveling workers, reporting tools, data roll back, shared data among departments, and secure apps for Apple IOS, Android, and Windows Mobile devices.

TurnKey Cloud was built from the ground up with business users in mind. From encryption so strong no one but you can see your data, to the most advanced features on the market demanded by enterprise users. Included management controls provide granular access and sharing policies, coupled with historical auditing of every file access, changed file, login and device that touches your company's data. TurnKey Cloud's unique business-class features like file access reporting and version control tracking help maintain business privacy and security policies and provide compliance tracking.

“Most cloud-based file sharing services are not focused on privacy or security and focus on consumer grade options like photo or music sharing.” said Adam Wills, CEO of TurnKey Internet, Inc. He continued “TurnKey Cloud fills the gap that businesses are asking for by delivering a secure and easy to use end to end encrypted experience that provides access controls, reporting, and total compliance tracking”.

TurnKey Cloud offers the industry's most secure all-you-can-eat models offering unlimited file sharing and data storage per user – combined with no user minimums, no contracts, no file size limits, and much more. For more information visit <https://TurnKeyCloud.com>
